### Carey Suggests | Solution For Ec. Depression

Senator Advocates Return To Home Crafts to Raise Standards of Living

"In order to solve the problem facing the United States and most of the countries in the world today, there should be a return to or a renaissance in the home crafts." This is the belief of The Honorable Hunsden Carey, State Senator, who addressed the student body at a recent convocation program

In elaborating on his topic, "Old Home Crafts and New Economics,' Senator Carey explained that since the industrial revolution that began in 1840, the conditions and stan-dards of living in the urban as well as in the rural communities have been lowered to such a degree that the only logical solution to the problem is that each family shall take up some home skill in order to supplement its earnings.

In Sweden, several years ago, it became stylish and fashionable to indulge in home crafts. Today, the people of Sweden are a happy and a prosperous group. According to Senator Carey, seventeen fears ago Sweden was faced with just such ago Sweden was faced with just such a situation as confronts Americans today. The proof of the success of a return to home crafts is evident all about us. Hand-woven woolens, home-made linens and foodstuffs demand the highest prices in the markets and are patronized by the more stylish and fashionable of the land.

Senator Carey suggests that fur-niture, clothing materials, food-stuffs, in fact, practically all the necessities of life can be produced by necessites of inle can be produced by each family group to suit its own needs and to supplement the pres-ent earnings of the group. All of these accomplishments were daily routines for the population before 1840.

The visiting member of the legislature concluded by throwing the challenge to those who are planning to be teachers that it is their duty, in helping to solve the American problem, to further this return or renaissance in home crafts.

### **YWCA Plays** Santa Claus

The Y.M.C.A. as usual is making its effort to see that this is a happy Christmas for the many children of the city who otherwise might have no Christmas at all. It is planning a program for the Christmas devotionals, to be held on December 15. This program will give every member of the student body a chance to do her own part. This contribution is to be a stocking filled with things to please the heart of either a girl or boy of school age. Since one of a pair is not much good by itself, it is also not much good by itself, it is also suggested that the mate to it be in-cluded with the candies, toys, books, nuts, etc. As this is a rather large undertaking for one person room-mates often prefer to work together and so fill one stocking for each

room.

The Y. W. choir has planned a musical program for this service. After the Christmas story and appropriate poems have been read the gifts will be brought to the front of the auditorium while soft music voices the spirit of the season.

#### What Do YOU Think?

With much controversy and agitation attendant, Washington, D. C. has made it illegal for communism to be taught or advocated in its public schools. Much as it may disdain the principles and working of communism, one may ask, does the government have the moral right to de prive an instructor of liberty in speech? This question which seems to be the leading wedge of the opposition might be answered thus. When a business man employs a secretary it is recognized as his right to demand of her secrecy and tact. No less, it appears, does the public have the privilege of specifying what shail be taught to Uncle Sam's nieces and nephews

But, as the opposition again may inquire, and as a professor at this institution so ably expressed it, does a parent avoid telling a child of a hot stove in order to keep him from burning himself? Furthermore, will the fact that the child hears no true definition of that particular "ism" in his classes mean he will not come to know about it from some other source?

"Without a word of warning"sible for a child to grow into his r the subject, might he not be all the by soap-box orators?

Students as an audience why with regard to attentiveness in convocation? We've all heard those son what stale yet true reasons why we should be quiet and behave while being addressed by a speaker. These reasons are, namely, respect for the speaker of the evening and consideration for the other person who is interested and wants to listen to the speech.

Let's play up another angle of the situation. We should pay homage to the speaker by giving him our interest and attention because of the innate satisfaction we derive from doing so. By being an alert, responsive listener you cease to be outside the affairs of the evening and, instead play a significant part. You as well as the speaker make for the success of the evening for what effect could be wrought even by the greatest orator of the universe without the aid of a sympathetic audience? Remember that throughout life we have to measure up to the criteria of educat

ed people, one of which is the ability to listen well. Can you?

Be smart! Put one over on Mr. New Year and make a few re tions before January 1. #### Spirited Giving

Christmas wreaths and holly already visible in windows bring thoughts of the coming holidays. With these thoughts, comes that pleasurable feeling known as day-dreaming. Weekend trips have been planned, dances, and sledding parties (providing that long yearned-for snow ever arrives). However, this thought comes to mind: do we have the real Christmas spirit?

The economic depression in this country is supposedly over. Yet there are tens of thousands who are still living in poverty, there thousands of small boys and girls who will look in vain on Christmas morning for what generous Santa may have brought. But in many of these homes brave mothers will have secured some little gift within their small means, and with this gaudy noise-maker, or that four-inch china doll which mother dressed from dress-scraps, the child will climb back into bed, untroubled by the inequalities of society, but satisfied that he was remembered.

The members of this gallant stratum of society-the four thousand

### Christmas Eve

By Dan S. Terrell

It was the afternoon before Christmas, and activity in the editorial rooms of the "Morning Bugle" was almost at a standstill. There was a faint odor of cigars and scotch the air, and the city editor, who had lost his week's pay check in an all-night poker session, sat behind his desk in an attitude which Josephs, the youngest reporter, thought must be very similar to the way Mussolini sat at council.

Suddenly he stopped looking over copy, glanced at one of the after-noon papers on his desk, and then looked around the room. "You, Josephs," he called from the

"You, Josephs," he called from the side of his mouth. "Go out and get me a Christmas story, something different. Something with human interest stuff in it—all about the poor devils that have to work on Christmas. You know the angle." "Yes, sir," Josephs replied, although he was not quite sure. "And say," continued the city editor, "on the way back stop at that lunch wagon on the corner and bring lunch wagon on the corner and bring
